

Participate in Research at MGH Lurie Center for Autism in Lexington, MA!

The mission of the Lurie Center for Autism is to advance knowledge of the causes of and treatments for autism spectrum disorder and other developmental disorders (such as Down syndrome and Williams syndrome) and rapidly translate these discoveries into exceptional clinical care over a lifetime. We are involved in collaborations with basic science researchers from around the globe to discover the fundamental causes of autism. At the Lurie Center, our Lexington based clinic offers children and adults with autism spectrum disorder and other developmental disorders an opportunity to participate in clinical research to expand our understanding of these disorders and provides unprecedented access to new and promising treatment options. With participation in research, our study volunteers join an important partnership with the research community and contribute to increasing knowledge of autism and related disorders.

You can learn more at the [Lurie Center Website](#) or by subscribing to our [Newsletter](#). You can also reach us by calling us at 781-860-1711 or emailing LurieCenterResearch@partners.org.
